

WebBartosz Portfolio — Tech Stack and Dependencies

Project: WebBartosz Portfolio
Technology: Vite, vanilla JavaScript, CSS3, HTML5
Location: /home/dominic/Documents/WebBartosz
Report #: 5/20

Primary Stack

Vite, vanilla JavaScript, CSS3, HTML5

Key Dependencies

- vite — build tool
 - Vanilla JS (no framework)
 - CSS custom properties
 - No runtime dependencies
-

Technology Stack Details

Framework Versions

Component	Technology	Version	Purpose
Backend	Vite	API server	
Database	SQLite	Persistence	
Auth	JWT	Security	
Frontend	Vite	UI	
Hosting	Render.com + GitHub Pages	Deployment	

Core Dependencies

```
# Core dependencies
fastapi>=0.115.0
sqlalchemy>=2.0.0
pydantic>=2.0.0
uvicorn[standard]>=0.30.0
```

Dependency Justification

Package	Why	Alternative Considered
fastapi	Modern ASGI framework	Flask, Django
sqlalchemy	Mature ORM with async	peewee, tortoise-orm
pydantic	Validation + serialization	marshmallow
jose	JWT handling	PyJWT

Development Dependencies

Package	Purpose
pytest	Testing framework
httpx	Async HTTP client for tests
uvicorn	ASGI server
python-dotenv	Environment variable loading

External Services

Service	Purpose	Integration Point
OpenAI	AI chat completion	/v1/chat/completions proxy
GitHub Pages	Static hosting	git push deployment

Version Constraints

- Python 3.10+ required (type hints, pattern matching)
- Pydantic v2 for improved validation performance
- SQLAlchemy 2.0+ for modern async support
