

Portfolio Daemon — Data Flow Analysis

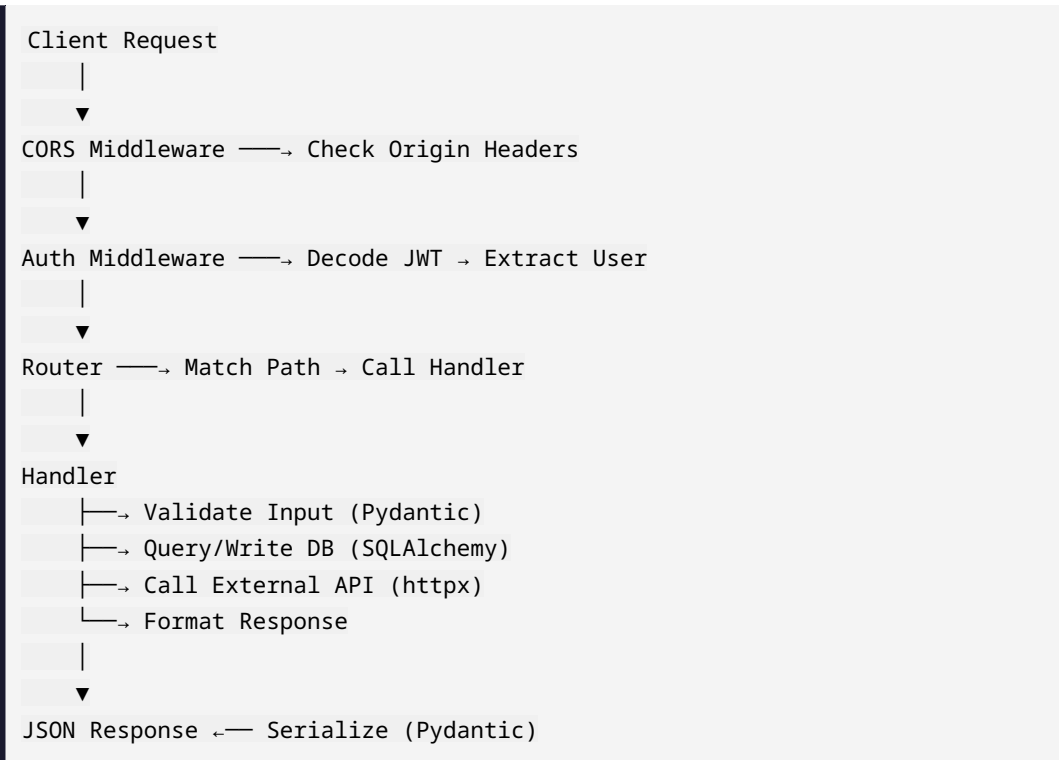

Project: Portfolio Daemon
Technology: Python, asyncio, asyncssh, httpx, watchdog
Location: /home/dominic/Documents/portfolio-daemon
Report #: 15/20

Request Flow

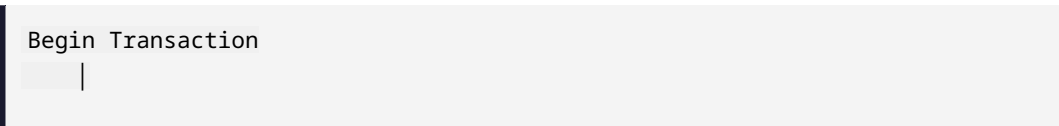

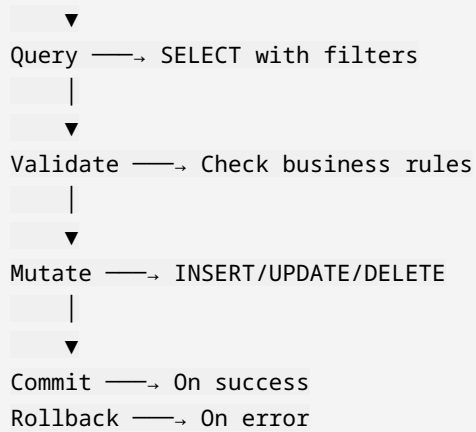

Data Flow Analysis

Request Data Flow

Database Transaction Flow

WebSocket Data Flow (Queue Module)

External API Data Flow (AI Chat Proxy)

Data Transformations

1. **URL shortening:** Long URL → short_code (base62 hash)
2. **Auth:** Password → bcrypt hash → DB
3. **RAG:** PDF → Text → Chunks → TF-IDF vectors
4. **Queue:** Task request → DB row → WebSocket progress
5. **Chat:** Message → JSON → API call → SSE stream
